Regjeringen samler løsninger for sensitive data i én nasjonal infrastruktur

Nyhet | Dato: 23.10.2025

Regjeringen har besluttet å samle dagens løsninger for behandling av sensitive data ved universitetene i én nasjonal infrastruktur. Målet er å styrke forskning, beredskap og innovasjon. Med sikre analyserom og bedre samhandling på tvers av sektorer, skal det legges til rette for trygg og effektiv bruk av helsedata til beste for pasienter, forskning og samfunn.

Transforming healthcare through data

What is the EHDS Regulation about

Unlocking the future of health data in Europe

The European Health Data Space (EHDS) is a cornerstone of the [European Health Union](#) and the **first common EU data space** dedicated to a specific sector as part of the [European strategy for data](#).

The EHDS Regulation aims to establish a common framework for the use and exchange of electronic health data across the EU. It enhances individuals' access to and control over their personal electronic health data, while also enabling certain data to be reused for public interest, policy support, and scientific research purposes. It fosters a health-specific data environment that supports a single market for digital health services and products. Additionally, the regulation establishes a harmonised legal and technical framework for electronic health record (EHR) systems, fostering interoperability, innovation, and the smooth functioning of the internal market.
